Improving Lives

Pinpoint Your Allergy Triggers

Getting an accurate allergy diagnosis is **EMPOWERING**.
Knowing your allergy triggers is **SMART**.

Our Why

At HYCOR, we believe that people with an allergy improve their quality of life when they know exactly what is causing their symptoms. Defining the underlying allergens is key!

Our How

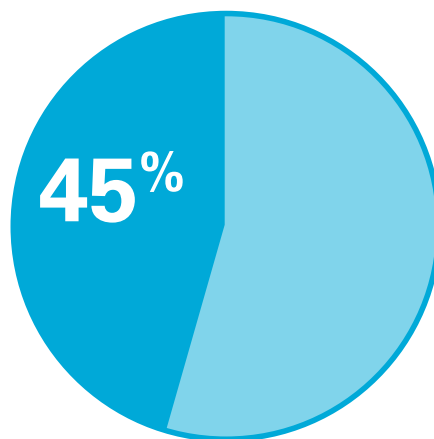

We empower physicians, laboratories, and patients with accurate allergy test results from a new standard of assays designed to limit the impact of interference.

Our What

We are solving challenges faced today in laboratories and clinical practices with the NOVEOS System, the first technological breakthrough in routine allergy diagnostics in 20 years.

THE RAPID INCREASE IN ALLERGIC DISEASES IS A REAL PHENOMENON!

45% of allergy patients are likely to be MISDIAGNOSED in Europe

150 million EU citizens SUFFER from chronic allergic diseases

EAACI http://www.eaaci.org/documents/EAACI_Advocacy_Manifesto.pdf. June 2015.

HYCOR helps to improve the health, well-being and quality of life for individuals with allergic conditions.

The first breakthrough in routine IgE testing in 20 years

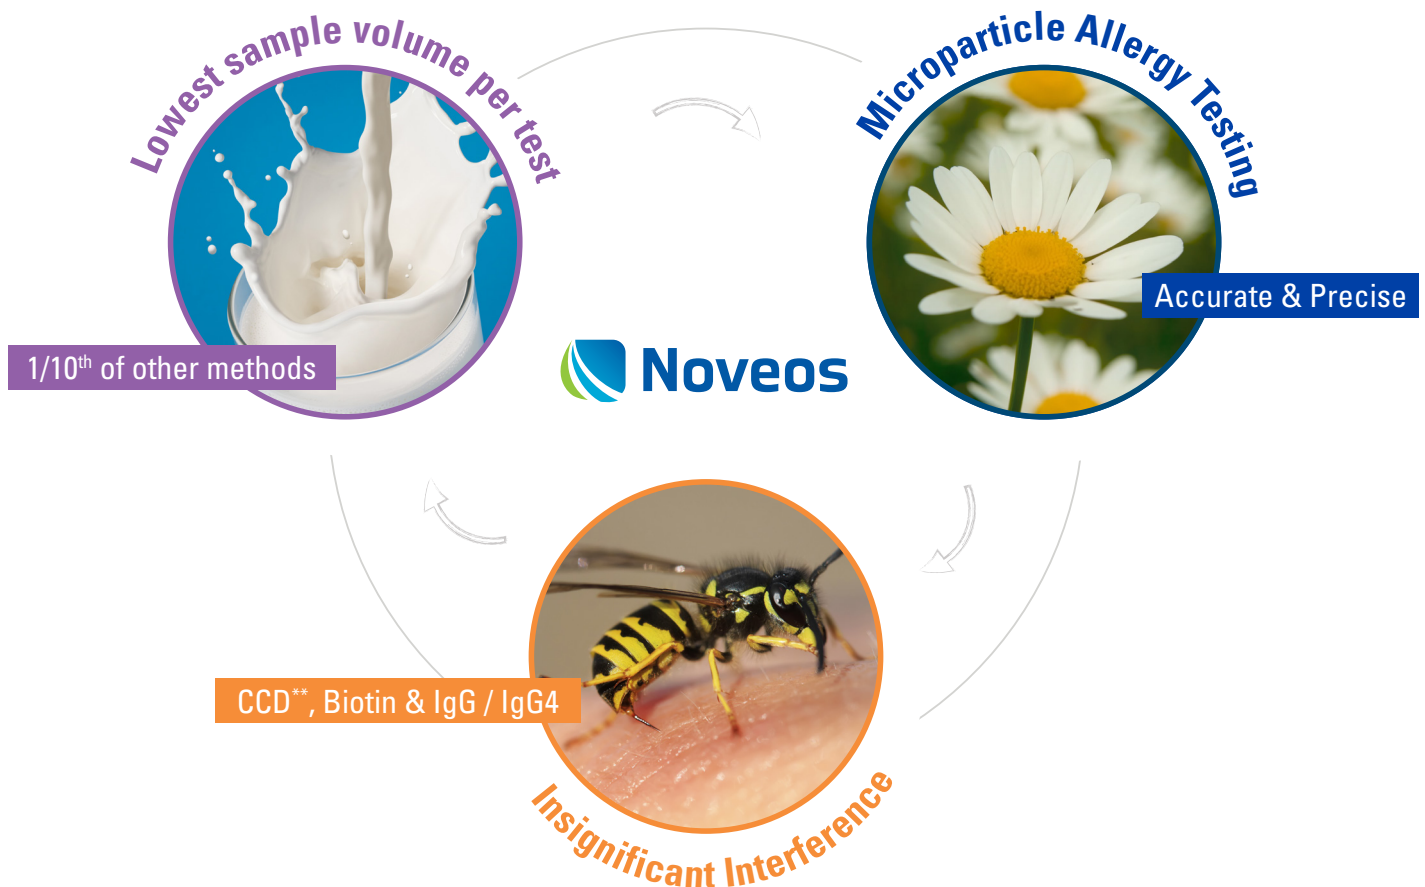

NOVEOS Technology

4 μ L OF SPECIMEN PER TEST

- Doing more with less reduces:
 - Quantity Not Sufficient (QNS) errors
 - Re-sampling
 - Trauma for hard-to-draw patients
- Improves lab workflow efficiency and lowers operational costs
- Minimizes prioritization trade-offs with clinicians
- Enhances patient care e.g., pediatric patients

ACCURATE & PRECISE RESULTS

- Assays designed to limit interference* from:
 - Biotin,
 - IgG / IgG4
 - Solid-phase related cross-reactive carbohydrate determinant (CCD)
- High sensitivity and an excellent low-end precision delivers actionable, reliable results for better clinical decisions
- Improves the quality of life for patients

CUTTING-EDGE IMMUNOCHEMISTRY

- High sensitivity and excellent low-end precision
- Large reagent lot sizes
- Use of standardized extracts when available

*Data on File.

**Solid-phase related cross reactive carbohydrate determinant (CCD)

**The NEW STANDARD in allergy testing,
solving shortcomings of current technologies.**
